

# THE EMPRESS EXPRESS

VOLUME IX, No. 18

EMPRESS, ALTA. THURSDAY, Sep. 29th, 1921

Price: \$2.00 Per Year

## UNION CHURCH

Next Sunday evening the subject for discussion will be "When Jesus refused a big dinner." Service conducted by Rev. V. M. Gilbert.

Sunday School, 11 a.m.  
Evening service, 7.30 p.m.  
Baptist Service, 3 p.m.  
Choir practice at the home of Mrs. H. H. Hall, on Friday evening at 8 o'clock.

## Rally Day Services Are Successful

Rally Day Services were held on Sunday in town and country and drew large attendances. The local Sunday School drew an attendance of 175 and the number present at evening service was much in excess of the average attendance. The musical numbers, both vocal and instrumental, were well rendered and appreciated by the congregation. The topic, "My Church," was timely and referred to things necessary in building up of a successful church.

## Anglican Church

October 2nd, 19th Sunday after Trinity, St. Mary's Church.

8 a.m., Holy Communion.  
7.30 p.m., Evening Prayer.  
3 p.m., at Cavendish.

For the future, services will be held in St. Mary's Church on the 1st and 3rd Sundays of each month.

L. J. Tatham,  
Priest-in-charge.

## "Outside The Law"

The crook dramas of recent years that are really great, may be counted upon the fingers of one hand or named with one breath. But a place among them has been earned by that story of the underworld, "Outside the Law."

The struggle of crooks to go straight is an old theme—but the struggle of Silky Mull and Depper Bill Hardard to live their

## The Empress Ladies Auxiliary

On Wednesday, of last week, the Ladies' Auxiliary, of Empress, were pleasantly surprised by a visit from Mrs. McCarter, of Medicine Hat, District Supt. of W.M.S. She gave a short talk at the regular monthly meeting held at the home of Mrs. Shoultice.

On Thursday afternoon she addressed a large gathering at the home of Mrs. H. Hammet Hall, telling of the different phases of W.M.S. work. Mr. Paxton and Mrs. Henderson assisted with musical numbers.

Mrs. McCarter remarked she found the Empress W.M.S. above the average of the usual Society in the work they were doing.

own lives, is a part but not the theme of the picture. It is merely the dramatic skeleton that sustains the comely flesh of human heart drama.

The real theme runs through the story like the undercurrent of a mysterious river it is the passion of an old Chinese philosopher for his ideals—principles of right and wrong, that fundamental and not sections and paragraphs from quibbling statute books. In his oriental devotion to what is right, E. A. Warren shows the Chinese dealing a justice outside the law.

Don McRae has moved his outfit to Kinistno, Sask., where he expects to have at least 30 day run.

## Good News for Farmers

### Seeking Dairying Information

It will be good news to many farmers of this district to learn that the Saskatchewan Creamery Co., are sending Mr. J. Stampe here, in the immediate future. Mr. Stampe, is an expert on matters relating to dairying. He is said to be in a class by himself on this subject. He will hold meetings throughout the district, dates of which are to be announced. All interested should not fail to put in attendance at these meetings.

## The Care of Cream

When one considers the many and varied processes that go to the production of cream it is disheartening to find that the separating of the less favorable are the conditions for complete separation. If the milk cools below 55 F., there is a tendency for too much fat loss in skin milk. Expert advice states that no separator will satisfactorily skim milk that is cold, especially milk which is 24 hours cold. Do not mix cold and warm cream.

The cream should be separated in a room which can be kept clean, free from dust and impure air, and the separator should be washed and scalded every time it is used. Cool the cream to 45 F., by setting it on the ice, cold spring water, or cold well water immediately after it has been separated. It certainly pays to put up ice for use in the dairy.

It is important to note that all dairy utensils should first be rinsed with warm water, then washed with hot water dissolving some good washing powder in same, after which these utensils should be scalded with boiling water, and placed on their sides, being given plenty of pure air and sunlight. As the heat of a utensil, having been properly scalded will readily dry it, a cloth should be dispensed with in favor of a dry brush and the latter used only in the washing process. The use of wooden or galvanized pails is against good system, well tinned pails without flaws are the more sanitary kind. The stopping up of holes in tin pails by means of wooden plugs or pieces of cloth will likely bring trouble, as such places will prove a harbourage of sour particles.

The best time for separating milk is immediately after it is

## ATLEE

Sept. 23

Mark Bunn has gone to Viking. He expects to take up land there and locate permanently.

Mrs. H. G. Ahern, and daughter returned from Black Hills, S. Dak., Thursday evening, where they had been visiting Mrs. Ahern's sister. She says the scenery is beautiful there and the crops are good.

A number of Atlee boys took drawn from the cow. The longer the time which elapses between the milking and the separating the less favorable are the conditions for complete separation. If the milk cools below 55 F., there is a tendency for too much fat loss in skin milk. Expert advice states that no separator will satisfactorily skim milk that is cold, especially milk which is 24 hours cold. Do not mix cold and warm cream.

in the Chicken Supper at Buffalo, the other evening. They said the chicken was fine. All the Atlee boys love chicken.

Mrs. Chas. Rough, and children went to Regina, on Monday, for a visit.

C. E. Hovey is putting a new fence around his farm, at the east end of the town.

Miss Audrey Bunn and Miss Hattie Pound have gone to Medicine Hat, to train for nurses.

Johnnie Pound has gone to Medicine Hat, for the fall. He may take up land there.

Mr. and Mrs. Read, had to take their baby to Medicine Hat. The child was suffering from a bad attack of inflammation of the kidneys. He is now improving nicely.

Mr. Committ, is in Medicine Hat, under the Doctor's care, on account of stomach trouble.

I have around 30 pairs of

**BOY'S SHOES**

sizes from 11 to 2, solid leather, guaranteed, no fibre or paper, at

**2.95 per pair**

Also a good assortment of

**SCHOOL of AGRICULTURE,  
GLEICHEN**

**Offers Two-year Courses in Agriculture and Home Economics**

These Courses are of five months duration each year and are free to young men and young women of 16 years and over.

The following subjects are dealt with:

### AGRICULTURE

Animal Husbandry, Field Husbandry, Farm Mechanics, Irrigation, Veterinary Science, Dairying, English, and Machine.

### HOME ECONOMICS

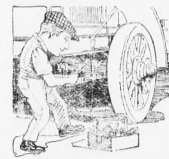

Cooking, Sewing, Home Nursing, House Management, English, Mathematics, Dairying, Poultry and others.

The term begins October 27th, 1921, and continues until March 31st, 1921

For full particulars and calendar of studies apply to—

THE PRINCIPAL,

School of Agriculture,  
Gleichen, Alberta.

**LET US GET BUSY**

On that broken or defective part of your car and make it right. You are not getting complete service or real pleasure from your auto or machinery investments if you are hampered by broken parts. We will keep them running for you.

## Value Of Experimental And Research Work As An Aid To Agriculture

Experimental and research work, promoted by, and under the guidance of, the Dominion Department of Agriculture, has made great strides in Canada during recent years. It is estimated, for instance, that the discovery of Marquis wheat by the Cereal Division of the Experimental Farms Branch has enriched the wheat growers of the three prairie provinces by \$20,000,000 annually, and that the introduction of Preston, Stanley and Huron wheats into the other provinces has brought about a gain of at least half a million dollars yearly. But wheat is not the only grain that has profited immensely through the work carried on at the Experimental Farms. By the introduction of Duesenberry, Victory, and in particular Banner oats, a gain has been made of over \$9,000,000 annually, while the new grains, such as barley, flax and peas, have proven responsible for an increase in value of \$3,000,000 annually. All of these must and will develop still greater profit to the country. Experiments in plant breeding work with garden and field crops have also resulted in a permanent increase. Immensely valuable research work has been done by the Division of Chemistry, and by the Division of Botany and by the Health of Animals, Entomological and Seed Branches. Canada has been shown to be the healthiest of countries in livestock, a fact which must be attributed in large measure to the excellent system of supervision and control adopted and developed by the Health of Animals Branch. By its precautionary measures and other activities it is considered that the Division of Botany has saved the country \$22,000,000 annually, largely by its crusade against snail and its control of late blight and rot of potatoes and other diseases to which plant life is subject. Research work in its laboratories by the Seed Branch has resulted in approximately 100,000 tons of screenings being made of maximum value to the livestock raiser. This is but one of the profitable results that have been achieved. Turning to the Entomological Branch, when it is stated that to field crops alone a justifiable estimate is that the depredations of insects cause a loss each year of \$125,000,000, as against the \$10,000,000 involved can be formed. In field husbandry, by the greater use of crop rotations and the ascertaining of most profitable results for each district, it is estimated that Ontario is benefited annually to the extent of \$32,000,000, while in the prairie provinces a system urgently encouraged by the Experimental Farms Branch, the prairie provinces are thought to gain \$60,000,000 annually. The work which will illustrate the advance that is being made in the development of Canadian agriculture.

### Alberta Butter

Butter Production at Present is Only at the Minimum.

The announcement that New York wants a million pounds of Alberta butter will be good news to the farmers of that province. In fact the farmer will find the new good as New Yorkers will find the butter. That is one kind of farm product that Alberta has more of than it knows what to do with. The butter is present is only at the minimum. When they get it in earnest, under the inducement of a steady export market at satisfactory prices, there is hardly a limit to the amount the creameries and farm dairies of Alberta can turn out. If New York will supply the market Alberta can supply the butter, in any quantity required.—Edmonton Bulletin.

"Made In B.C." Campaign.

The "Made in B.C." campaign, according to the secretary, three thousand families in the province have already pledged themselves to use only British Columbia made goods, with the expectation of thus obtaining additional pledges this week.

Indian Cadet Corps.

Major Miller of Calgary is authority for the statement that the cadet corps of Blood Indians is the smallest and most advanced corps in the province. This following his annual tour of inspection.

W. N. U. 1377

### British Stock Breeders Surprised

Canada Can Supply England With Finest Grade of Beef Cattle.

Members of the Clerical party of British stock breeders and dairymen, who have been investigating the possibilities of the cattle industry, a field of supply for the British market, said that what they had seen led them to arrange to give an order for at least 2,000 head of cattle, if the embargo is lifted.

S. R. Jaggard, of Norfolk, and James Allison, of Leicestershire, both of whom are known as very large feeders in the Old Country, were most enthusiastic over what they saw in Calgary. Mr. Allison declared: "We never expected to see at the Calgary show anything like we did see. It was a magnificent show of the finest stock, and it is genuine to the last drop after purchased stock. We want more of the ordinary type of beef cattle. And I can assure you we have seen all kinds and plenty of the finest kind of very good cattle. They would be welcomed in England. Yes, they are the equal of any and ever American stock. You need have no fear about any of the splendid cattle we have seen in many places, particularly in the prairie provinces, where the graziers in the Old Country. We are pleased beyond our expectations, which really did not lead us to believe that the country has such a fine grade of first-class beef cattle, just what England wants. Once the embargo is lifted, we have no fear about that—it will be lifted—and once it is, Mr. Jaggard himself will order 2,000 head from Western Canada to be shipped at once."

### France Objects To German Films

Invasion of Cinema Field Alarms French Republic.

A German invasion of the French cinema field is under way. Several films of German origin, but bearing the names of American and British titles, were snapped up last month when offered at prices about 50 per cent of what the French producers would have paid. They will be shown all over France, and a loud outcry has been made by the French producers, the theatrical world and even American circles. The report that Goldstein, the Russian who recently acquired the Apollo Theatre, intends making a specialty of Viennese and Berlin music, with a new comic opera by Franz Lehár at the biggest feature next season.

### Ranching in the North

Ideal Country For Ranching in the Peace River Country.

There is no more ideal ranching country in the Dominion of Canada than that lying along the Key River and adjacent streams in the Peace River country. The land is owned by who owns what is considered the finest ranch in the north country. This is located about halfway between Peace River Crossing and Fort Vermilion. He has the inconvenience of having to travel 250 miles for his mail, but states enthusiastically that the beauties of the ranch, the excellence and extent of the pasturage, and the climate of the district, are more than ample compensation.

### Resources Of Labrador

Have a Waterfall that Eclipsees French Falls in Quebec.

Canada and Newfoundland are to ask the privy council to settle their dispute as to the ownership of 250,000 square miles of territory in Labrador, and to a young Toronto lawyer, Charles Percy Plaxton, has been entrusted the task of preparing Canada's case for presentation to the law lords. Mr. Plaxton is an official of the department of justice. A party of 700 surveyors the department will make inquiries as to the mineral and other resources of the country. One report is that there is a waterfall in Labrador that eclipses Niagara.

### Increased Imports.

There was an increase of more than eleven and a half million dollars in the value of imports to Canada during the twelve months ending May 31st, 1920, as against the previous period. At the same time the exports of Canadian produce from Canada showed a decrease of more than \$52,000,000. The total value of imports to Canada in the period under review was \$1,162,160,367, and of exports \$1,178,948,956.

### Innovations In British Air Express

Many Novelties Introduced for Improvement of Passengers.

A new De Havilland lighted Continental "air express" plane, improved in details, has come into service on the London-Paris airway, according to a aeronautical correspondent of the London Times. It is now calculated that with a fleet of such machines, operating constantly, the full route London-Paris, a full load of passengers can be carried by air at a maximum speed of 13 miles an hour and an average "cruising" speed of 108 miles an hour, for a total cost per passenger per mile of not more than 35d., which is the rate of the first class railway fare in England.

One of the innovations in this new express plane is a private lavatory, displayed in the saloon. Another is a structure for air travellers. They are informed, for example, that if a machine is inherently stable; that if a plane is, as experienced, these will be due mainly to wind-gusts, and should in no way inspire fear. "We never expected to see at the Calgary show anything like we did see. It was a magnificent show of the finest stock, and it is genuine to the last drop after purchased stock. We want more of the ordinary type of beef cattle. And I can assure you we have seen all kinds and plenty of the finest kind of very good cattle. They would be welcomed in England. Yes, they are the equal of any and ever American stock. You need have no fear about any of the splendid cattle we have seen in many places, particularly in the prairie provinces, where the graziers in the Old Country. We are pleased beyond our expectations, which really did not lead us to believe that the country has such a fine grade of first-class beef cattle, just what England wants. Once the embargo is lifted, we have no fear about that—it will be lifted—and once it is, Mr. Jaggard himself will order 2,000 head from Western Canada to be shipped at once."

### The Uncertainly Paradise

Under Failure of the Communist Plan in Russia.

To Communists rendered anxious by the drying up of the golden stream from Russia, we commend the view that that country which filters through the more fortunate inhabitants make their escape from their native land.

Such members of the Soviet Government as can contrive to get away without their departure with a lot of platinum coming and going, seem to appear to be making an intelligent use of their opportunities. Only six months ago they were in the work of regeneration by bankruptcy. Even these do not seem to be entirely in accord. Mr. Trotsky is being anxious to get Mr. Lenin under the care of a specialist in mental disease. Mr. Lenin is equally anxious for the health of his affectionate colleague, and recommends a "rest cure" in the Crimea, while popular enthusiasm towards Mr. Dzerzhinsky is so great that the hint, has, so far, manifested itself chiefly in the form of brickbats. Meanwhile Russia itself is a veritable kaleidoscope of confusion.—From the London Daily Mail.

### New Colonization Policy

Planned by B.C. Government for Settling Unoccupied Lands.

A comprehensive colonization policy is being planned by the British Columbia Government for the purpose of settling some of the vast areas of unoccupied lands in that province. Experienced farmers are the class of men who it is desired to bring in and to these men it is proposed to loan a sufficient sum of money, up to \$2,500, to help to get started.

At the other western provinces of Canada, colonization is the greatest problem of the country. Only in 1918, in 800 of the prairie provinces, area is under the plough, or one acre in every eighty suitable for agriculture. In 1920 350,000 acres were being cultivated. To double this cultivated acreage would mean double production and sufficient farm produce would be marketed to wipe out the poverty of foodstuffs now necessary.

### Saskatchewan Creameries.

In 1920 forty-seven creameries operated in Saskatchewan produced seven million pounds of butter. Five new creameries are in course of erection at Yorkton, Assiniboia, Weyburn, Shaunavon and Empress. There is only one cheese factory in the province which produced 28,367 pounds of cheese last year.

### At The Crossroad.

At a crossroad it is better to sound the horn and turn back than to break through to step on the accelerator and try to beat the other fellow across.—Youth's Companion.

#### Early Days In The Hudson's Bay Service

By O-G-E-MAS-ES (Little Clerk).

(Copyrighted)

It was early summer of 1878 and I was a boy of twelve years. I was a member of the Hudson's Bay Company (the headquarters for the H. B. Co. in that district), and I was a member of the Hudson's Bay Company. Every available able-bodied man had been engaged by the company, either for the arduous trip to Fort Reliance, or to the Mackenzie River district, or else on the river steamers.

A missionary's wife with three little girls had just come in from the north on route for the Red River; a poor Scotchman with a beaver in his bonnet had been sent in from an outfit with a long report showing that the isolation had been too much for him, and though not dangerous he was to be sent to a sort of midland home.

It was decided to send him in to Fort Garry for medical examination. All of these people made extra money to feed, and the Chief Factor suggested that I take them down to Grand Rapids by York Boat and there connect with the steamer "Colony."

It was quite agreeable to this, providing some sort of crew could be found, and after a good deal of enquiry, old Antoine Moran turned up, he having come in by the Brocket boats. This French half-breed had been posted some years before by the Indian and the effect still showed every summer in the peeling of the skin off his face and hands, the latter being so cracked that he could only do his work with gloves.

However, I was glad to get him as he was an excellent steersman and knew the river. Then there was a young son of an Indian lad named Kitchik-moon—(Big Knife) a devil for mischief, an American bourgeois was sent to get rid of him. This was all my crew, but of course we had the current of the river in our favor, for we could not possibly stem it. It was truly a motley crew and I shuddered to think what would become of us all if we happened to take the wrong channel, as we simply had no power to return. It took eight good men to pull a York boat up-current on the Mackenzie.

As usual, the Hudson's Bay Company provisions for our trip was scanty enough, therefore I snuggled in an old fish net in case of being stranded, as there was thirty miles of Cedar Lake to cross, and straight fish diet was a long way better than nothing.

Having been on the Lower Saskatchewan for some years I was equipped against mosquitoes, and such mosquitoes—quite beyond my imagination of any one who has not been there. The whole country for many miles is inundated in the spring, and this is followed by a tremendous growth of rank grass, an ideal breeding ground for the plague. Once on a muddy, close, exclusive trail, I landed with eight Indians from a York boat, the very weight and density of the mosquitoes drove me into the boat; then, each man took a blanket and forcibly beating the swarms with them we managed to get the kettle boiled, but were only two miles to the middle of the river to get in comparative peace. No more of the mosquitoes.

There was a stony mainland to our right, no land visible to the westward and no mosquitoes, also a most beautiful view of the high mountains of the Little girls who were quite happy with the change from the river. We landed in a pretty bay for dinner and the family enjoyed a good wash. By this time the wind was freshening so away we went again, making faming time. There was only one question that we were off our course. After an hour or so of brisk sailing a narrow opened to the eastward and old Antoine Moran, who was in the lead, said, "There is Cedar Lake!" And sure enough it was. However our troubles were not yet over by any means. The boat, then, each man took a blanket and forcibly beating the swarms with them we managed to get the kettle boiled, but were only two miles to the middle of the river to get in comparative peace. No more of the mosquitoes.

There was a stony mainland to our right, no land visible to the westward and no mosquitoes, also a most beautiful view of the high mountains of the Little girls who were quite happy with the change from the river. We landed in a pretty bay for dinner and the family enjoyed a good wash. By this time the wind was freshening so away we went again, making faming time. There was only one question that we were off our course. After an hour or so of brisk sailing a narrow opened to the eastward and old Antoine Moran, who was in the lead, said, "There is Cedar Lake!" And sure enough it was. However our troubles were not yet over by any means. The boat, then, each man took a blanket and forcibly beating the swarms with them we managed to get the kettle boiled, but were only two miles to the middle of the river to get in comparative peace. No more of the mosquitoes.

There was a stony mainland to our right, no land visible to the westward and no mosquitoes, also a most beautiful view of the high mountains of the Little girls who were quite happy with the change from the river. We landed in a pretty bay for dinner and the family enjoyed a good wash. By this time the wind was freshening so away we went again, making faming time. There was only one question

## Wrong Class Of Immigrants

Now Recording Only People Who Will Go On the Land

According to press despatches an Italian steamship company is diverting its vessels from American to Canadian ports, opening up a new service between Canada and Italy. Under the circumstances there is no cause to cheer, for the reasons for this change of route are all too evident. Some time since the laws respecting immigration were revamped by the United States government for the purpose of diverting the flood of continental immigrants. The law as it now stands permits only a very small percentage of any foreign nation to land at American ports, and in consequence these Italian steamship companies operating to America can ports are finding business difficult to obtain. We are therefore, to be made the dumping ground.

In April last there landed in Canada 666 immigrants from Poland, Italy, Belgium, Finland and Russia, and of this number 317 were Polish Jews. This is over three times as many immigrants as these countries supplied in the same month a year ago and under present conditions it is just 666 too many.

The government cannot act too quickly in this matter. We want immigrants of a certain class, and that is people who are accustomed to farming and will go on the land. All immigration should for the time being at least be confined to this class. We have sufficient "Socialists" ready without importing any more.

These people will land here, most of them with the \$250 which is necessary to have under our present immigration laws, and after that is spent will become a charge upon the country until such time as they can obtain employment. To my own knowledge there are at present many foreigners in our cities who have not had a tap of work for months and who must sooner or later become public charges. The diverting of these Italian ships to Canadian ports will surely mean a flood of workmen for whom there is at present no work. Toronto Saturday Night.

## Japanese Buy

Canadian Sheep  
150 Shrophires Were Shipped Recently From Ontario.

Mr. Salt, representing the Japanese Department of Agriculture and Commerce, has recently purchased through J. H. Patrick & Son, of Ilderton, Ontario, 150 Shrophires for shipment to Japan. The Japanese had previously made some purchases of sheep in England and the United States, but this is the first purchase made in Canada. In addition to the 150 Shrophires made here, 408 Ramboulets have been bought in the United States.

Indubitably is a new thing in Japan. Fourteen years ago according to statistics compiled by the United States Department of Agriculture, there were less than 100 in the whole country, and even today the number is estimated at less than 60,000. There is not now either for such expansion of animal husbandry of any kind in Japan itself, as the original empire with a population approaching 70,000,000 has only about 40 per cent of the area of Ontario. If, however, Japan obtains a considerable foothold in Siberia, as the possibility may, she may develop largely along all agricultural lines.

**A Tough Subject.**  
We had a chat with an old miner who has just completed his mining jubilee.

"Fifty years ago I first went down the shaft," he said, "and I've never had an accident. Leastways, I've only had a scratch or two." "And what were they?" we asked. "Oh, nothing serious," he said. "I've been squashed a few times, broke my arm once, and my leg got twisted, and once I split my head open. But nothing serious like, say, yer know."—London Morning Post.

**Will Visit West Indies.**  
In view of the agitation for a wider measure of representative government and improvement in the constitution, it is learned that the British Government has delegated the parliamentary under-secretary of state to pay an official visit to the West Indies in December. Preparations are being made to urge upon him that the status of the Government no longer be raised, but that at least \$500,000 be arranged to carry out improvements in the island.

At a safe distance we do not hesitate to say that the prize fighters are no better than they should be.

## Europe's Surplus Women

May Exercise a Stronger Political Influence Than Before the War.

What the war did to disturb the ratio of male to female population in Europe is indicated by the statistics published in Berlin showing a surplus of 15,000 women. Where are they to find husbands? The question is asked with grave concern on the apparent assumption that marriage is still the manifest destiny of the sex. But it is conceivable that a considerable proportion of them will accept spinsterhood with a better grace than would have been the case a decade ago and find consolation for domestic life in a career.

At all events, it is probable that the women of the Teutonic countries of Europe, from sheer force of numbers, will exercise a stronger political and social influence than ever before. The war, while altering their marriage status, has inevitably increased their economic importance.

Yet will the contradictory result occur of an increase of marriages in the face of a proportional decrease of men of marriageable age? This is what has happened in France, where the number of marriages in 1920 was double that in 1919, rising from 312,036 to 623,869. For the first time in six years there were more births than deaths in France, and in 1920, the excess amounting to 139,999. Allowing for a corresponding increase of German marriages, there would still remain a great body of single women with a preponderant balance of social power in their hands.—The New York World.

## Interesting Career Of Japanese Sailor

Started as Machinist Helper and Earned Admiral's Rank.

To begin life as a machinist helper, graduate from a naval engineering college, serve long years in the Imperial Japanese navy in the engineering branch of the service, retiring from the navy with rank of rear admiral, for a position of director of the Sumitomo Copper Works, and then to retire altogether from business and emerge once more into commercial activity, this time as shop foreman of the shops where he started life, is a very condensed synopsis of the life of M. Obata, a brother of N. Obata, the present Japanese Minister to the United States.

Mr. Obata had retired from all business activities for the purpose of making a study of Buddhism, and a very condensed synopsis of his life. Very little was heard of him from this time until very recently when the Sumitomo Copper Company began to have disputes with the labor. On hearing of this trouble Mr. Obata came out of his retired life, and together with his services as shop foreman, in which position he thinks he can work for the harmony and understanding necessary to the peace of employers and employees. The Sumitomo officials accepted Mr. Obata's offer, and the former rear admiral can now be seen in the world working with the shops at the workmen's overalls, supervising and directing the work which is once more becoming familiar to him.

## Was Pleased to Meet Her.

A minister tells of a strange young fellow who brought his daughter young bride to the church parsonage for matrimonial purposes. "According to my usual custom," says the minister, "I turned to the director of the ceremony, and said, 'John, this is your lawfully wedded wife.' In the excitement of the occasion, John turned in the direction of his newly-acquired lifemate, and stammered, 'I'm pleased to meet you.'"

## An Open Secret.

It is said that the ancient Chinese sage who lived in the second century was offered a bribe. His silence he refused. The other looked very seriously at him, and he was assured that he was perfectly safe, as no one knew it. He replied: "I am a sage. Everybody knows it. You know it. I know it. How can you say that no one knows it?"—A New Evening Post.

## Worse Still.

The two fair maidens were seated side by side on the resort hotel porch, and the other looked very seriously at him, and he was assured that he was perfectly safe, as no one knew it. He replied: "I am a sage. Everybody knows it. You know it. I know it. How can you say that no one knows it?"—A New Evening Post.

The tramway system of Buenos Aires is the largest of any city in the world, there being about three hundred and fifty miles of line in operation.

## A UNIQUE COMPASS.

BACK LONGITUDES

## THE FACE OF THE DIAL & COMPASS

A silver mounted compass which is nearly 200 years old and is fitted with a sundial, also longitudes and latitudes of important cities and ports, was presented by a Miss Buckle, a passenger on board the Canadian Pacific liner Metagama, to Mr. E. Cox, the third class steward, as a token of gratitude while on a voyage to Canada.

Mr. Cox states that the Squire of the Parish of Weston, Northamptonshire, presented the compass many years ago to the Rev. Buckley of Weston, who was Miss Buckley's grandfather, and when he died he left it to her. The compass is in a well-preserved gilded case, inside which is the following inscription:—

"This compass was a dial given me by Sir George Osborn in 1773 it having been Sir Basil Dinwiddie, made at Paris about the year 1727-18-19."

When opened the sundial and compass are on the face, while on the back of the compass are the longitudes and latitudes.

It was found a very valuable instrument for carrying in the old hunting days.

## Fifty Years Of Progress

Tremendous Growth of the Dominion In Half a Century.

To compare conditions in Canada today with those of 1867, the year of the Confederation, is something of a revelation, even to those who are fully alive to the fact that the intervening years have been an era of progress. Since the provinces were united the railway mileage has increased from 2,238 to 38,896 last year, and the number of bank branches from 123 to 4,500. Grain elevators were entirely unknown in 1867, and from being regarded doubtfully as a possible while-growing country, Canada has consistently carried off the first honors of the American Continent for ten years. The capital invested in manufactures in 1867 was less than \$78,000,000, whereas last year it had reached \$303,400,915. Canada's present position as a mineral producing country is worthy of note. The coal supply is equal to 17 per cent of the world's supply, and of certain minerals the Dominion has practically a monopoly. The Dominion produces 90 per cent of the nickel, 88 per cent of the asbestos, 85 per cent of the nickel, and 32 per cent of the pulpwood. Twelve per cent of the world's production of silver and 4 per cent of the gold comes from Canada.—United Empire.

## Five Per Cent Electrified.

The United States leads the world in eagerness to adopt modern conveniences—and yet, according to a statement made at a recent gathering of electrical industrial experts in Boston, the United States is only 5 per cent electrified. There are 8,500,000 electric lighted automobiles, but only 650,000 electric lighted houses in this country.

## Driving Them Back.

The Greek Nationalists have removed their capital from Athens to Casarea, 160 miles farther into the interior. Since the Greeks have demonstrated the case, where which this Turkish power could be crushed, the western nations should feel doubly confident that any abandonment of Armenians to destruction after the Great War had been won.—Buffalo Express.

## British Debt Decreasing.

Great Britain's external debt now amounts to £1,161,560,000, a decrease for the year ending March 31 of £17,411,000, an official return states. The chief creditors are the United States, £972,704,000, and Canada, £53,339,000.

The caterpillar knows that there is safety in numbers, and whole companies may be found feeding side by side while keeping a sharp lookout for their bird enemies; but when a caterpillar is by himself he fears to stray to move for fear of attracting attention.

## The Canada Highway

All-Canada Road Finished In Five Years To Estimate.

The All-Canada Highway will be established within five years, it is the prediction of ex-Mayor Todd, of Victoria, vice-president of the Canadian Highways Association; Stephen Jones, of Victoria; H. J. Scott and Arthur Lindeham, of Vancouver, comes from the State of Washington, and provinces arousing interest in the plan.

Part of this road will be finished in 1921 when Banff and the Windermere Link in British Columbia will be in place. A few days ago the federal government allocated \$500,000 to complete this highway, which also will form part of a circle tour from Calgary through the Rockies and back by way of the Crow's Nest Pass and Macleod or Lethbridge.

## Warning To East

Fruit Growers Reclon on Rivalry From West.

Unless the fruit growers of Quebec and Ontario adopt more modern methods of packing, grading and marketing their fruit, they are likely to be fore long to find that British Columbia apple growers will have made serious inroads on their trade, inroads which have already got well under way, not only from British Columbia, but from the Western United States. This was the warning given by the pomological and fruit growing section of the province of Quebec by Prof. W. T. Macoun, of the experimental farm, Ottawa, in the course of an address on "Impressions of Western Activities."

## Warning To East

Fruit Growers Reclon on Rivalry From West.

Unless the fruit growers of Quebec and Ontario adopt more modern methods of packing, grading and marketing their fruit, they are likely to be fore long to find that British Columbia apple growers will have made serious inroads on their trade, inroads which have already got well under way, not only from British Columbia, but from the Western United States. This was the warning given by the pomological and fruit growing section of the province of Quebec by Prof. W. T. Macoun, of the experimental farm, Ottawa, in the course of an address on "Impressions of Western Activities."

## Lady Begg a Novelist.

Lady Begg, one of our more conventional, is likely to be a prominent figure not only in the social circles of the Dominion, but also in the literary world, for she is heralded as a successful novelist, author of two very popular romances, "Barriers" and "Aeneas of the Marshlands." Both books are of quite recent publication in England; Canadian readers will be available for Canadian readers at an early date.

## Belgian King's Car.

King Albert of Belgium is credited with the largest touring car in the world, a car of the very latest type, an ordinary body in front, with a large coach-like trailer attached. It has accommodation for fifteen persons and sleeping quarters for ten. The trailer consists of a kitchen, bathroom and combination lounging and dining space. The scheme is designed for hunting in Africa.

Australia is said to have about one hundred species of snakes, three-fourths of them venomous.

## Good Housing Saves Cattle Feed

Proper Ventilation of Barns Is Essential to Health of Stock.

More especially when feed is scarce it is important that farm animals make the best use of what they consume. Cattle will eat much more in quarters that are too cold, or on the other hand, where proper ventilation cannot be provided, will not only fail to put on flesh, but also to give milk to their full capacity. While cattle can accustom themselves to unfavorable stable conditions, it is better to provide conditions as near perfect as is practicable. Cattle living in a cold temperature will take on much heavier coats of hair than those which are warmly housed. This ability to adjust themselves explains in some measure the success that attends feeding cattle for best in open sheds. No successful farmer, however, would think of keeping dairy cows in open sheds in the winter, and of keeping them in a stable in which the air temperature is not to some extent controlled.

It is commended by livestock authorities that it is worth while to provide for a proper ventilation of all stock buildings. A necessary factor in stable ventilation is to so construct the walls as to practically exclude the air, and to have the windows and doors so fitted up as to avoid draughts of air blowing on the animals. The ventilation system should be independent of other avenues of air.

Experimental Farm Bulletin No. 78, available at Ottawa, points out that the air in a stable where the thermometer shows a steady degree of frost may easily be very impure. Matters should be so arranged, it is pointed out, that there shall be about the right number of air changes. The stable, allowing, say, from 600 to 800 cubic feet of air space for each cow two years old and over. With a well built stable thus fitted with a well pointed out that the capacity of the outlet should be about 15 square inches for each cow. A square inch of outlet should be about 8 square inches for each animal. A square 36 feet by 30 feet by 10 feet high, accommodating 18 or 20 head, should have an outlet about 18 inches square or 20 inches in diameter. It round, while the inlets should be at least 16 inches by 12 inches, and two in number.

The Experimental Farm has at these several farms and a radiating system of ventilation, which is fully explained in the bulletin already mentioned, and which may be obtained from the Publications Branch, Queen Street, Ottawa.

## England Abused

German Propaganda Which the G.W.V.A. Has Taken Action To.

A passage in one of the booklets containing insulting reference to Great Britain written by Ferdinand Hancke, Hamburg, Germany, says: "I hope the day may soon come when Germany will be able to cast off or cut off the foul tentacle the English Octopus has hung around her." The gallant little republic of Ireland will be freed of its English butchers and their henchmen, and the stolen Gibraltar will once more be Spanish soil; stolen Malta, Italian; stolen Cyprus, Greek, and stolen German colonies, Germany; when the last Britain will be driven out of the great empire of the Indian people, where his regime has been cruel, relentless and bloody."

He hope likewise that the day is not far distant when the conquest of Canada, peaceful or by force of arms, will be an accomplished fact."

The decision of the G.W.V.A. to combat this propaganda has taken after consultation with the president, R. B. Maxwell.

## To Market Potatoes

New Marketing Plan Being Tried Out In Alberta.

A co-operative marketing scheme for the disposal of potatoes similar to that already in force in Michigan and Minnesota will be tried out this year by Alberta farmers, according to J. H. Hare, commissioner of marketing for the Provincial Department of Agriculture. The scheme will involve the establishment of a grading station at which all potatoes will be graded for shipment. The potatoes will be sold at the other end, potatoes going through in such cases subject to rejection.

Oysters can only live in water that contains at least thirty-seven parts of salt to every one thousand parts of water.

It pays to patronize home industry. Buy from the merchants in your own town.

October 1st, 1921

D. McEachern, Treasurer

Al and Reg. Sturgeon left on Monday, for Moose Jaw.

P. Spappen, of Bindloss, was an inmate of the local hospital for a few days.

Miss Opal Boyd has been indisposed this week and unable to teach at the Beauty Land School.

Albert Keith is taking his threshing outfit to the Prince Albert, Sask. district.

The I.O.D.E. will meet at the home of Mrs. N. D. Storey, Tuesday, October 4.

Bill Ellis, of Estonia, Sask., was a visitor in town Monday. Bill is still in the "hard wear" game.

Mrs. Andrew Sturgeon, has taken up her residence in town and is looking after her son's children.

Grant Antrim, of Red Deer, Alta., is a visitor to town this week, looking after his business interests here.

The Can. Pac. Railway line from Acme to Drumheller is reported as being now practically complete.

Stewart Trail and his son, Archie, left by car on Monday evening for Kiustino, where they will join Dan McRae's threshing outfit.

Mrs. L. Pullin returned on Saturday from her former home, where she has been spending an extended visit with her parents.

### Do you believe in signs?

HERE is one you can bank on—the sign of a company that has stood between the country and its fire losses for over a century.

It is also the sign of a live agency—one that specializes on insurance—one that is watchful of your interests as well as the interests of the companies it represents.

When you see this sign, think of protection. Think also of agency service. You can safely rely upon our property and in securing prompt and fair settlements in case of loss.

R. M. Henderson

Notary Public &amp; Conveyancer

The

Sure Insurance Agency

W. R. Brodie, was a business visitor to Moose Jaw, on Monday.

Miss Ewing, of Preble, Sask., was the guest of Mr. and Mrs. John Humphries, last week.

R. H. Richards is moving his confectionery and ice cream business into a new store location on Centre St.

All subscribers who pay up their subscription, on request, will have the Canadian Farm Power magazine mailed to them free of charge. The regular price of the magazine is \$1.50 a year.

A party in honour of Miss Betty Lawson, was held at the home of her aunt, Mrs. Wm. Crosby, Wednesday evening. A small presentation was made. Miss Lawson is to leave, shortly for Medicine Hat, where she will train for the medical nursing profession.

B. Leeper, of Bindloss, was a visitor in town, Monday, and paid us one of his occasional calls. Bert has put up quite a little rye hay; that and a few head of milk cows, he says, are proving a real assistance this year.

Mrs. J. Hughes, and children, left on Wednesday, for Kenora, Ont. Mr. Hughes has been working at his trade there for some considerable time.

A number of the young men from the south-west country left for the north, this week, to secure employment on threshing outfits.

J. E. Vernon, of Winnipeg, was a visitor in this district on Monday and Tuesday, looking after his farming interests in township 21, 1.

W. C. Boyd, received word this week of the death of Mrs. J. H. De la, mother of Mrs. Boyd. She was about 84 years of age and her death was due to a paralytic stroke. Mrs. W. C. Boyd is at present at Fortland, Ont., and is expected home on Saturday.

The new railway time table becomes effective October 2. There are no changes in times of train service to the west. To Swift Current, No. 66 leaves at 10 a.m., No. 65 arrives 10:40 p.m.

Mr. and Mrs. J. E. Johnston, and son, of Stayner, Ont., who have been the guests of Mr. and Mrs. J. M. Leach, left on Saturday for the east, and will visit at other points before returning home.

## Can. Pacific Railway

### Change in Train Service

Effective Sunday, OCTOBER 2nd, 1921

SOUTHERN EXPRESS, Trains 13 and 14, will be withdrawn, west of Moose Jaw, last trains from St. Paul and Vancouver, October 1st.

Times for trains at Empress will be: To and from Swift Current, Daily, except Sunday.

No. 66 (v.) 10 a.m.; No. 65 (ar.) 10:40 p.m.

To and from Calgary: Mon., Wed. and Fri., No. 61 (v.) 8:00 a.m.

Tues., Thurs. and Sat., No. 61 (ar.) 10:10 p.m.

For further particulars apply to any ticket agent.

J. E. PROCTOR  
District Passenger Agent, Calgary

## Why I'm Here Today

I was born in Indiana. And I'm wishing I was back. From this wind that howls and moans. About my humble farmstead shack.

Down in that good old Hoosier State. The air is soft and warm. And that is why those Hoosiers raise The possum and the corn.

That was where your seely post lived. Long years ago. That is where I used to swing an ax. And wield a rusty hoe.

I used to work like Russell Sage. Indeed I labored some. 'Till Grover Cleveland threw a tool. That put me on the bum.

Then with my pack upon my back. I wandered far away. I kept on wandering like a fool.

And that's why I'm here today. The Hoosier Post.

## BIRTHS

Born—To Mr. and Mrs. J. H. Swinburn, of Social Plains, September 25, a son.
